Anshul Ramprasad

Agentic AI Engineering | LLMs, Orchestration, RAG & Evaluation

anshulramprasad@gmail.com | +60 12-298-1192 | Kuala Lumpur, Malaysia | linkedin.com/in/anshulramprasad

SUMMARY

Applied AI builder with hands-on experience in conversational agents, LLM integration, RAG, routing, orchestration, and multilingual evaluations. Combines Python, FastAPI, Weaviate, SQL, and API-based workflows with technical product leadership. Builds and improves agent behavior using real conversations, structured tests, tool boundaries, and human review.

WORK EXPERIENCE

TWIMBIT MALAYSIA **Sep 2023 - Present**

Lead Product Manager, AI & Growth | Previously Consultant & Research Analyst *Kuala Lumpur, Malaysia*

Rae | Enterprise Sales Enablement Agent

- Led product delivery and contributed directly to development of Rae, a RAG-based sales-enablement agent serving 350+ registered CelcomDigi Enterprise Business users.
- Personally improved system prompts, retrieval/generation rules, document accessibility, source formatting, web search, and automatic routing; used approximately 5,000 conversations to identify intent and response-quality failure modes.
- Worked hands on with FastAPI and Weaviate to improve agent workflows, evaluation harnesses, and search behavior; used Claude Code and Codex to inspect implementations and contribute response-logic changes before engineering review.
- Independently built and ran a 104-case automated LLM-as-judge evaluation pipeline across English, Malay, and Chinese, drawn from approximately 4,000 reviewed conversations; combined scoring with human review and regression retesting.
- Built SQL/PostgreSQL pipelines and Metabase dashboards to analyze conversation cohorts, workflow usage, and adoption; connected agent improvements and enablement to recovery in monthly active users from 15 to 175.

Rae Engage | Customer-Facing AI Agent | View agent

- Owned Rae Engage, a customer-facing conversational lead-qualification agent, and contributed directly to its build using AI-assisted development tools.
- Designed multi-turn interactions, intent classification, consent, qualification, lead scoring, structured data capture, and Salesforce handoff requirements around the visitor's business enquiry.
- Defined approved-knowledge boundaries, edge cases, error handling, guardrails, customer-data handling, UAT, and human handoff requirements with engineering, privacy, sales, CX, and brand teams.

Technical, Product & Customer Leadership

- Designed approximately 30 workflow-specific assistants and collaboratively shaped internal agents, using system instructions, retrieval/tool boundaries, structured outputs, validation, and human checkpoints.
- Designed a deep-research orchestration workflow coordinating research agents and a synthesis agent; built AI-assisted research and content workflows that helped increase annual output from approximately 150 to 400+ pieces.
- Led technical product discussions and AI enablement reaching approximately 70 internal employees; co-led external cohorts for 150+ participants on model selection, prompting, assistant design, and practical workflows.

H ROSEN ENGINEERING MALAYSIA **Sep 2022 - Apr 2023**

Systems Implementation & Evaluations Intern *Kuala Lumpur, Malaysia*

- Developed Python scripts to automate econometric chart generation from ESG and macroeconomic datasets; contributed to an internal Python analytics course for financial analysts.

THE SEACEN CENTRE MALAYSIA **Apr 2022 - Jul 2022**

Data Processing & Analytics Intern *Kuala Lumpur, Malaysia*

- Automated ETL and data-conversion workflows for international client delivery; designed a Power BI pipeline-operator dashboard to improve access to operational data.

PROJECTS & ADDITIONAL EXPERIENCE

Sage | Solo-built voice-first health assistant | View project

- Solo-built a voice-first health assistant with Claude API, Supabase, Lovable, and Web Speech API; connected browser voice logging with AI-assisted visit capture, document intelligence, and a longitudinal health timeline.

OpenClaw | Persistent agents and open-source project | GitHub

- Built and operated a persistent-agent environment with a personal knowledge base, memory/retrieval patterns, scheduled automations, recurring jobs, and Git auto-sync; open-sourced the project and documented lessons.

Real Estate Marketing | Independent automation work

- Implemented AI-assisted marketing automation for individual real estate agents, reducing production time by approximately 80%.

EDUCATION

Taylor's University, Kuala Lumpur, Malaysia **Aug 2019 - Dec 2022**
BCompSci (Hons) - Data Science and Artificial Intelligence | CGPA 3.4 | Dean's List

SKILLS

Agent Systems: LLMs, conversational AI, multi-step orchestration, RAG, tool use, routing, prompt/context engineering, structured outputs, memory, guardrails, human handoff

Quality & Data: LLM-as-judge, multilingual evaluations, regression testing, failure analysis, conversation analytics, SQL, PostgreSQL, Metabase

Development: Python, FastAPI, Weaviate, Claude API, APIs, Supabase, Web Speech API, React, GitHub, JavaScript/TypeScript (working familiarity)

Tools & Delivery: Claude Code, Codex, Cursor, Lovable, n8n, OpenClaw, workflow discovery, technical requirements, UAT, client communication

CERTIFICATIONS

AWS Partner Sales Accreditation (2025), Google Data Analytics Foundations (2024), Salesforce Reports and Dashboards Superbadge (2022), Casugol Advanced Python Professional (2021)
