Anshul Ramprasad

Forward Deployed Engineering | Enterprise AI, APIs & Product Analytics
anshulramprasad@gmail.com | +60 12-298-1192 | Kuala Lumpur, Malaysia | linkedin.com/in/anshulramprasad

SUMMARY

Product-minded AI builder with a computer science background and hands-on experience improving enterprise agents, backend workflows, APIs, and analytics. Combines Python, SQL, FastAPI, RAG, and evaluation work with customer discovery and technical leadership. Leads product delivery while contributing directly to implementation, testing, and adoption.

WORK EXPERIENCE

TWIMBIT MALAYSIA **Sep 2023 - Present**
Lead Product Manager, AI & Growth | Previously Consultant & Research Analyst *Kuala Lumpur, Malaysia*

Rae | Enterprise Sales Enablement Agent

- Led solution design and product delivery for Rae, a RAG-based sales-enablement agent serving 350+ registered CelcomDigi Enterprise Business users; partnered with engineers on implementation, code review, and staging validation.
- Used approximately 5,000 conversations to diagnose response failures; personally improved prompts, retrieval behavior, web search, and automatic routing across internal knowledge, external sources, and general responses.
- Worked hands on with FastAPI and Weaviate to improve agentic workflows, evaluation harnesses, and web-search behavior; used Claude Code and Codex to inspect response flows and contribute implementation changes.
- Built and ran an automated 104-case LLM-as-judge evaluation pipeline across English, Malay, and Chinese, grounded in approximately 4,000 reviewed conversations; diagnosed failures, implemented changes, and retested.
- Built SQL/PostgreSQL analytics pipelines and Metabase dashboards for active usage, retention, funnels, and conversation cohorts; combined usage evidence with enablement to help recover monthly active users from 15 to 175.

Rae Engage | Customer-Facing AI Agent | View agent

- Owned Rae Engage, a customer-facing lead-qualification agent on CelcomDigi's business website; shaped the workflow from discovery and pilot scope through build planning, UAT, and launch readiness.
- Contributed directly to the agent build using AI coding tools; designed multi-turn flows, structured lead capture, consent, qualification, scoring, and Salesforce handoff requirements.
- Aligned sales, CX, brand, product, privacy, and engineering stakeholders on integration boundaries, approved knowledge, error handling, guardrails, human handoff, and success measures.

Technical, Product & Customer Leadership

- Translated account-manager workflows across six enterprise verticals into technical requirements, PRDs, and working prototypes; used early builds to resolve ambiguity before engineering handoff.
- Designed workflow-specific assistants and multi-step agent orchestration with retrieval and tool boundaries, structured outputs, validation, and human review; helped a three-person team scale annual content output from approximately 150 to 400+ pieces.
- Led client working sessions and internal AI training reaching approximately 70 employees; co-led external enablement for 150+ participants, translating system behavior and implementation tradeoffs into practical decisions.

H ROSEN ENGINEERING MALAYSIA **Sep 2022 - Apr 2023**
Systems Implementation & Evaluations Intern *Kuala Lumpur, Malaysia*

- Developed Python scripts to automate econometric chart generation from ESG and macroeconomic datasets; contributed to an internal Python analytics course for financial analysts.

THE SEACEN CENTRE MALAYSIA **Apr 2022 - Jul 2022**
Data Processing & Analytics Intern *Kuala Lumpur, Malaysia*

- Automated ETL and data-conversion workflows for international client delivery; designed a Power BI pipeline-operator dashboard to improve access to operational data.

PROJECTS & ADDITIONAL EXPERIENCE

Sage | Solo-built voice-first health assistant | View project

- Solo-built a voice-first personal health assistant using Lovable, Supabase, Claude API, and Web Speech API; integrated browser voice logging, AI-assisted visit capture, document intelligence, and a longitudinal health timeline.

OpenClaw | Persistent agents and open-source project | GitHub

- Built and operated persistent-agent workflows for a personal knowledge base, scheduled automations, recurring jobs, and Git auto-sync; open-sourced the setup and documented practical implementation lessons.

Real Estate Marketing | Independent automation work

- Automated marketing workflows for individual real estate agents using AI tools and structured processes, reducing production time by approximately 80%.

EDUCATION

Taylor's University, Kuala Lumpur, Malaysia **Aug 2019 - Dec 2022**
BCompSci (Hons) - Data Science and Artificial Intelligence | CGPA 3.4 | Dean's List

SKILLS

Development & Data: Python, SQL, PostgreSQL, FastAPI, APIs, ETL, Supabase, Metabase, GitHub, React, JavaScript/TypeScript (working familiarity)

Applied AI: LLM integration, Claude API, RAG, Weaviate, tool use, automatic routing, prompt/context engineering, structured outputs, agent orchestration, LLM-as-judge evaluations

Customer Delivery: Workflow discovery, solution design, technical requirements, prototyping, UAT, integration planning, stakeholder alignment, training, adoption, product analytics

Build Tools: Claude Code, Codex, Cursor, Lovable, n8n, OpenClaw, Jira, Confluence, Figma

CERTIFICATIONS

AWS Partner Sales Accreditation (2025), Google Data Analytics Foundations (2024), Salesforce Reports and Dashboards Superbadge (2022), Casugol Advanced Python Professional (2021)
