Anshul Ramprasad

Lead Product Manager | AI Product Builder | Product Strategy
anshulramprasad@gmail.com | +60 12-298-1192 | Kuala Lumpur, Malaysia | linkedIn.com/anshulramprasad

SUMMARY

Product manager leading a live GenAI platform for 350+ enterprise users, owning roadmap, discovery, analytics, PRDs, and stakeholder management. Hands-on AI builder with fluency in assistants, agents, workflows, and model testing, plus a strong working understanding of the AI industry, tools, and product landscape.

WORK EXPERIENCE

TWIMBIT MALAYSIA Sep 2023 - Present
Lead Product Manager *Kuala Lumpur, Malaysia*

- Led product management for a GenAI sales enablement platform serving 350+ account managers, owning roadmap, PRDs, analytics, content strategy, and stakeholder management across Twimbit and CelcomDigi.
- Drove platform recovery from 15 to 175 monthly active users by identifying from 30 months of data that every successful feature needed a paired activation event, then using that insight to shape launch strategy.
- Authored multiple PRDs and design specs using a structured forcing-question process with three-lens review, producing clearer specs for engineering and faster idea testing through AI tools.
- Architected the team's product analytics strategy across Twimbit's product arm, standardized reporting, and used the data to make more informed, user-behavior-driven decisions.
- Conducted multiple customer discovery sessions with frontline account managers across six verticals, synthesized the pain points, and turned them into feature priorities and PRD problem statements.
- Designed and led Rae Engage and the related commercial pilot end to end, owning the purpose, solution framing, stakeholder alignment, and build plan while shaping the commercial model with the client.
- Replaced a failed push-based content calendar with a demand-driven content strategy and a self-publishing approach, validated through a hands-on proof-of-concept.
- Reframed client requirements before building by turning broad asks into sharper adoption and enablement problems, helping the team move faster and build with more clarity.

H ROSEN ENGINEERING MALAYSIA Sep 2022 - Apr 2023
Systems Implementations & Evaluations Intern *Kuala Lumpur, Malaysia*

- Analyzed ESG and macroeconomic datasets and built Python scripts to automate chart generation for the research team.
- Helped build an internal Python data analytics course that upskilled financial analysts across the organization.

THE SEACEN CENTRE MALAYSIA Apr 2022 - Jul 2022
Data Processing & Analytics Intern *Kuala Lumpur, Malaysia*

- Automated ETL and reporting workflows to support faster international client delivery.

PROJECTS & ADDITIONAL EXPERIENCE

Sage | Solo-built Lovable Vibeathon 2026 project

- Built a voice-first personal health assistant to solve the friction of daily health tracking between clinic visits for chronic care and recovery users. Designed around natural voice logging, daily check-ins, reminders, monitoring, AI visit capture, document intelligence, and a longitudinal health timeline using Lovable, Supabase, Claude API, and Web Speech API.

OpenClaw | Open-sourced build + thought leadership

- Ran OpenClaw personally to explore always-on agents, personal knowledge bases, automated crons, and Git auto-sync workflows.
- Open-sourced the repo and codebase so others can learn from the build, then wrote thought leadership on where persistent agents do and do not make sense.

Real Estate Marketing | Side project

- Automated marketing for individual real estate agents using AI tools and workflows, reducing production time by ~80% while increasing content output on demand.

EDUCATION

Taylor's University, Kuala Lumpur, Malaysia *Aug 2019 - Dec 2022*
BCompSci (Hons) - Data Science and Artificial Intelligence | CGPA 3.4 | Dean's List

SKILLS / INTERESTS

AI / LLM: ChatGPT, Claude, Codex, Manus, AI Studio, LM Studio, OpenRouter, Hugging Face, n8n
Build Tools: Cursor, Antigravity, Lovable, Alloy.ai, model evaluation, agent design, workflow orchestration, prompt engineering
Product Management:PRD writing, roadmap prioritization, agile/scrum, customer discovery, stakeholder alignment, product marketing
Analytics: SQL, PostgreSQL, Metabase, cohort analysis, funnel optimization, A/B testing, Power BI, Tableau
Engineering: Python, TypeScript, React, R, Java, C++
Tools: Figma, Jira, Confluence, Notion, Miro, Slack, Gemini, Claude Design, GitHub
